IEG-245/69  
5 August 1969

MEMORANDUM FOR: Chief, Technical Services & Support Group, NPIC

ATTENTION: [REDACTED]

SUBJECT: Request for [REDACTED] Motor Film Drive

1. In response to your oral request on 14 July 1969 concerning our interest in replacing the present motor drives on the [REDACTED] MIM-4 Light Tables, the Imagery Exploitation Group requests that one light table be modified for their evaluation.

2. The present film drives on the [REDACTED] tables are erratic and cause vibration which is detrimental to detailed examination of film. IEG was impressed by the ease of operation and positive control provided by the [REDACTED] motor film drive on the 918 Light Table. Although motorized drives are to be a part of the 1540 Light Tables developed by [REDACTED] and/or [REDACTED] it is advisable to have one table modified by [REDACTED] for comparison of the film drive systems.

[REDACTED]  
Chief, Imagery Exploitation Group,  
NPIC
